Weight: 0.00kg

Dimensions: 0.00cm x 0.00cm x 0.00cm

Description

Mobile Safety Ladder - 10 Step

Top Step: 2500mm

Base Width: 950mm

These ladders are self-supporting structures that have 4 wheels or castors that swivel for easy maneuverability, 2 x wheels are lockable preventing them from rolling when required.

A mobile safety ladder is ideal for stock picking and is commonly used between racking and shelving.

Also included are non-slip steps, a small platform at the top, and a hand railing for safety. Only the best galvanized steel is used to manufacture these mobile ladders.
